

SI/HPC (Hydra) Workshop

The Bioinformatics Working Group is hosting a workshop for new users of the Smithsonian High-Performance Cluster (Hydra). We encourage interns and those new to HPC to participate.

Hydra is a Linux-based cluster consisting of nearly 4,000 CPU cores, distributed over 108 compute nodes and over 24TB of total RAM. It is connected to 500TB of high performance disk.

WHEN: June 11, 2018, 1pm-4pm

WHERE: NMNH WG-33
